

## Vaxcyte Announces Commencement of Proposed Public Offering of Common Stock and Pre-Funded Warrants

January 30, 2024

SAN CARLOS, Calif., Jan. 30, 2024 (GLOBE NEWSWIRE) -- Vaxcyte, Inc. (Nasdaq: PCVX), a clinical-stage vaccine innovation company engineering high-fidelity vaccines to protect humankind from the consequences of bacterial diseases, today announced that it has commenced an underwritten public offering of its common stock and pre-funded warrants. All shares of common stock and pre-funded warrants to be sold in the offering will be offered by Vaxcyte. Vaxcyte intends to grant the underwriters a 30-day option to purchase up to an additional 15% of the number of shares of its common stock offered in the public offering (including shares underlying the pre-funded warrants). The offering is subject to market and other conditions, and there can be no assurance as to whether or when the offering may be completed, or as to the actual size or terms of the offering.

BofA Securities, Jefferies, Leerink Partners, Evercore ISI, Guggenheim Securities and Cantor are acting as joint book-running managers for the offering. BTIG and Needham & Company are acting as lead managers for the offering.

A shelf registration statement relating to the offered securities was filed with the Securities and Exchange Commission (SEC), and was automatically effective upon filing on July 2, 2021. A preliminary prospectus supplement and accompanying prospectus relating to the offering will be filed with the SEC and will be available on the SEC's website, located at [www.sec.gov](http://www.sec.gov). Copies of the preliminary prospectus supplement and the accompanying prospectus relating to this offering may be obtained, when available, from BofA Securities NC1-022-02-25, Attention: Prospectus Department, 201 North Tryon Street, Charlotte, North Carolina 28255-0001 or by email at [dg.prospectus\\_requests@bofa.com](mailto:dg.prospectus_requests@bofa.com); Jefferies LLC, Attention: Equity Syndicate Department, 520 Madison Avenue, New York, New York 10022, by telephone at 1-877-821-7388, or by email at [Prospectus\\_Department@Jefferies.com](mailto:Prospectus_Department@Jefferies.com); Leerink Partners LLC, Attention: Syndicate Department, 53 State Street, 40th Floor, Boston, MA 02109, by email at [syndicate@leerink.com](mailto:syndicate@leerink.com) or by phone at (800) 808-7525, ext. 6105; and Evercore Group L.L.C., Attention: Equity Capital Markets, 55 East 52nd Street, 35th Floor, New York, New York 10055, by telephone at 1-888-474-0200 or by email at [ecm.prospectus@evercore.com](mailto:ecm.prospectus@evercore.com).

This press release shall not constitute an offer to sell or a solicitation of an offer to buy these securities nor shall there be any sale of these securities in any state or jurisdiction in which such offer, solicitation or sale would be unlawful prior to registration or qualification under the securities laws of any such state or jurisdiction.

### About Vaxcyte

Vaxcyte is a vaccine innovation company engineering high-fidelity vaccines to protect humankind from the consequences of bacterial diseases. The Company is developing broad-spectrum conjugate and novel protein vaccines to prevent or treat bacterial infectious diseases. Vaxcyte's lead candidate, VAX-24, is a Phase 3-ready 24-valent, broad-spectrum, carrier-sparing pneumococcal conjugate vaccine (PCV) being developed for the prevention of invasive pneumococcal disease and is proceeding to Phase 3. VAX-31, the Company's next-generation 31-valent PCV, is the broadest-spectrum PCV candidate in the clinic today.

Vaxcyte is re-engineering the way highly complex vaccines are made through modern synthetic techniques, including advanced chemistry and the XpressCF™ cell-free protein synthesis platform, exclusively licensed from Sutro Biopharma, Inc. Unlike conventional cell-based approaches, the Company's system for producing difficult-to-make proteins and antigens is intended to accelerate its ability to efficiently create and deliver high-fidelity vaccines with enhanced immunological benefits. Vaxcyte's pipeline also includes VAX-A1, a prophylactic vaccine candidate designed to prevent Group A Strep infections; VAX-PG, a therapeutic vaccine candidate designed to slow or stop the progression of periodontal disease; and VAX-GI, a vaccine program designed to prevent Shigella. Vaxcyte is driven to eradicate or treat invasive bacterial infections, which have serious and costly health consequences when left unchecked.
